SUMMARY

Software Developer building **AI-driven automation systems across CRM, communication, and mobile platforms**. Experienced in designing **AI-powered calling pipelines, automated lead qualification, and custom Android calling infrastructure** using Frappe Framework, Python, Flutter, and Kotlin. Focused on scalable automation that reduces manual work and enables data-driven decisions.

EXPERIENCE

Software Developer • **AssetPlus** Chennai, Tamil Nadu • On-site

Apr 2025 – Present

- Built an **AI-powered calling pipeline** using **Sarvam AI** to automatically contact advertisement leads and perform first-level screening before human engagement.
- Designed **lead qualification and filtering workflows** so only high-quality prospects advance to the next stage of the sales process.
- Developed internal communication automation using **WPPConnect**, **Puppeteer**, and WhatsApp integrated with Frappe for instant lead alerts and faster team response.
- Replaced traditional tele-calling by building a **custom Android ROM + mobile app** enabling agents to call via SIM while auto-capturing call logs and recordings.
- Built a server-side AI pipeline processing call recordings using **Sarvam AI**, **Gemini**, and **OpenAI** to generate call QA summaries, insights, and performance analytics stored in the CRM.
- Developed the mobile app using **Flutter (Dart) + Kotlin** with **Provider** for state management, **Dio** for HTTP, and **SharedPreferences** for local storage.
- Integrated **Google Calendar** with the CRM for meeting scheduling and appointment tracking.
- Built analytics dashboards in **Frappe Insights** to track team performance, lead conversion, and AI-generated insights.
- Implemented **real-time synchronization** of lead data across CRM modules and optimized message handling queues for improved operational efficiency.

Senior Full Stack Engineer • **Makto Technology** Coimbatore, Tamil Nadu • Remote

Dec 2022 – Mar 2025

- Built a mobile-first product delivery app for UAE operations using **Flutter (Dart)** — developed both customer and delivery agent apps with seamless cross-role UX.
- Integrated **Firebase** for real-time database, **Stripe** for secure payment processing, and **Google Maps** for live order delivery tracking.
- Built a **React-based admin panel** for managing orders, operations, and platform configuration.
- Developed and maintained an internal React-based **Warehouse Management System** with role-based access, inventory tracking, and master data management via REST APIs.
- Led **5+ ERPNext implementations** using Frappe (Python + JavaScript) across CRM, Fleet Management, Healthcare, and Education domains.
- Developed 3 proprietary internal apps on ERPNext — reduced operational costs by **40%** and improved team productivity by **50%**.
- Integrated **LinkedIn** and **Google Forms** with ERPNext to automate data collection and business workflows.
- Implemented a **Git-based CI/CD pipeline**, improving deployment reliability and development velocity.
- Active contributor to the **Frappe developer community**, sharing solutions and best practices.

TECHNICAL SKILLS

Languages	Python • JavaScript • Java • Dart (Flutter) • Kotlin
Frontend	React JS • Flutter • Android Development
AI & Automation	Sarvam AI • Gemini API • OpenAI API • WhatsApp Automation • Workflow Automation
Frameworks	Frappe / ERPNext • Puppeteer • WPPConnect • Provider • Dio
Backend & APIs	REST APIs • Telephony Integration • Custom Android ROM • Google Calendar API
Databases	MySQL • PostgreSQL • Firebase
Payments & Maps	Stripe • Google Maps API
DevOps & Tools	Git • CI/CD • Linux

EDUCATION

Sona College of Technology, Salem

Graduated Jun 2022 • CGPA 7.64

Final Year Project: Face Mask Detection (ResNet50 deep learning model) — [GitHub](#)

CODING PROFILES

[LeetCode](#) • [Stack Overflow](#) • [Frappe Community](#)
